## STERILE EXAMINATION GLOVES

**STERILE R**

$\gamma$  min 25 kGy  
Gamma

Hygiene and cleanliness of our sterile gloves are our first priority.

At STGT, we choose Gamma ray radiation process that has high penetration and has no residue left over in order to ensure that our sterilized gloves are clean from germs and chemicals. All our sterile gloves are processed and monitored by a global leading sterilization and contamination specialist with more than 40 years of experience in providing safe and effective gamma radiation sterilization.

CE 0123

### Packing of sterile gloves.

POLYOLEFIN film is used for packing each pair of our sterile gloves to ensure the hygiene and safety of each glove. Polyolefin is recognized to be the packaging material that can withstand the sterilization from ETO, Electron beam to high penetration Gamma ray.

「Touch Of Life™」

In life, every touch has a meaning.  
From the first day that we are born into this world,

---

A pair of gloves takes us to our mother's embrace.  
As you move through stages of life,  
gloves help to protect you. Across industries, from medical to food and manufacturing  
of many great products, gloves have become an essential part of our life.
