

The **fastest language learning system** at this time  
transferred to an **interactive 3D-AVATAR** controlled by **Artificial Intelligence**

Project

# AVATAR - Learning Languages in 3 days

The **REVOLUTION** in Language Learning Systems

**Required financial support for seed round: EUR 2.5 million**

The invested capital will outperform in a time period of ca. 5 years (max.)

**Current status**

- The Bylitza-System: Learning the < basics of foreign language > in three days and speak it. It is **the fastest language learning system** at this time.
- The system is suitable for all languages - supported bei AI learning glasses
- The system is suitable for medical support
- Know-How \* Scientific supervision and support \* Highly professional and experienced IT-Team

**Benefit**

- Overcoming the language barriers worldwide, quick and easy.
- Already with the prototype (approx. 6 month time for development ) we will qualify doctors, nurses, as well the complete medical staff (for Germany in the first step). The opportunity to finance further developments.
- Outside of the medical area, we can now qualify with the prototype, specialists of all economic sectors, which will be needed in the German market.
- Later on the AVATAR can be used for many other services and specific tasks like: All kinds of tutoring, training of expert systems.....

**Potential Customers**

- Every Internet / Mobil User is our Potential Client.
- Platform for the support of Carehomes, Doctors & Patients via Internet (IHO, International HUMANITY Organisation, a.s.o.)

**Seedround financing**

1. Company Set-Up
2. Developing / Programing - AI – AVATAR
3. Marketing
